In order to develop biotechnologies in medicine and cosmetology, the biotechnology company Mediland was established in Ukraine.

The premises and equipment of the laboratory meet European and International GMP standards.

“Modern biological technologies require a well-established material, scientific and technical base and human resources.”

Dr. Andrei Kharkov
OUR BENEFITS & ACHIEVEMENTS

We are one of the few clinics in the world that successfully combines fetal and mesenchymal stem cells treatment

- Premises and the latest laboratory equipment that meet European and International GMP standards
- Highly-qualified staff with long and successful experience
- The work is carried out in strict accordance with the global standards of cell cultivation
- A high speed of performing biotechnology operations
- Adherence to strict standards of quality and safety of biotechnology at all stages of biomaterial producing ensures its complete safety and the highest quality
- We got many patents for our unique inventions which are in high demand and successfully applied in different fields of medicine
- We have more than 80 medical specialists
- Our bioproducts have been sent to the best clinics abroad in 12 different countries
- Our specialists made presentations at more than 30 international and local conferences and congresses
- Thanks to Mediland successful results, Ukraine is gaining a status number 1 destination for fetal stem cell treatment
Fully licensed clinic: we are among only 14 Ukrainian medical enterprises that have received all licenses for their stem cell treatment
MAIN PATENTS
MAIN PATENTS
OUR MAIN EXPERTS
